

MERCEDES-BENZ WHEEL ALIGNMENT

CAMERA TECHNOLOGY FOR YOUR WORKSHOP

Powered by  **JOSAM**®

INVEST IN MODERN TECHNOLOGY TO GROW YOUR BUSINESS

- Homologated by Mercedes-Benz for trucks, buses and light commercial vehicles.
- Measurement values integrated into Mercedes-Benz warranty claim sheet.
- Guided measurement procedures according to Mercedes-Benz principles and specifications.

INCREASE YOUR TURNOVER

A quicker and modern way will enable you to diagnose a vehicle in matter of minutes. This will increase your turnover as many vehicles are subject to being adjusted.

Diagnosis could also create spin-off activities such as sales of suspension related spare parts (bushings, tie rods, ball joints, bearings etc.).

MEASURE EVERY VEHICLE FROM V-CLASS TO BUS AND HEAVY DUTY VEHICLES

THE MERCEDES-BENZ Wheel Alignment System with all its different adapters and additions is able to measure every possible commercial vehicle on the market, including the V-Class with Sprinter and Vito.

THE UNIVERSAL WHEEL ADAPTER fits all rim sizes from 14" to 26" with extensions. In combination with the compact frame gauges the system is suitable for measuring everything from light commercial vehicles to the heaviest trucks and buses. As the frame gauges can be altered in width, they can be adapted from narrow to wide bodies.

MEASURING TRAILERS is also easy, as the frame gauges are hung on the chassis using the centerline as reference.

DIAGNOSE A 6X2 VEHICLE WITH
70%
INCREASED
SPEED

[DIAGNOSIS]

A SYSTEM IN A CLASS OF ITS OWN

- By putting sensors on the wheels and measuring both forward and backwards, you will be able to measure all possible vehicle combinations that come into the workshop.
- The system is designed to measure and adjust multiple steered vehicles in a simple and accurate way.
- Thanks to its portability the system can be used at every location in the workshop and at the customer's site. This will optimize the flow in your workshop and therefore also your productivity.
- The camera technology enables the system to diagnose frame damages and create report sheets that are accepted by insurance companies.
- A European product developed for European trucks and buses.

INCREASE CUSTOMER VALUE

WHEEL ALIGNMENT HAS A LARGE INFLUENCE ON:

- FUEL ECONOMY
- TIRE COST
- DRIVING COMFORT
- SAFETY ON THE ROAD

CALCULATION EXAMPLE 1

Fuel cost reduction: 3%
Mileage/year: 150 000 km
Fuel price: 1.1 EUR/litre
Fuel consumption: 3.5 litres/10 km
Total cost reduction/year:
 $0.03 * 150\ 000 * 1.1 * 0.35 = 1\ 733$ EUR

CALCULATION EXAMPLE 2

Premature tire change, 2 tires/year
Tire cost: 350 EUR/tire
Cost reduction/year:
 $350 * 2 = 700$ EUR

Estimated
fuel/tire cost
reduction per year:
2 433 EUR*

* Cost for wheel alignment not included in the calculation

Source, fuel cost reduction:
Survey performed during 2013 on 500 vehicles from 12 different companies
by the research institute TNO, Holland

WHY JOSAM SHOULD BE YOUR BUSINESS PARTNER

- The same camera technology is also used in all Mercedes Benz truck and axle assembly plants globally.
- For 45 years, Josam has been a global supplier for wheel alignment equipment with its focus on commercial vehicles only.
- Josam was the first wheel alignment equipment to be homologated for Mercedes Benz trucks and buses in 1985.
- Our wheel alignment competence is spread globally through our training centres.
